

Gateway Mobile Theft Protection Solution

Using Computrace® Complete by Absolute Software

PC Theft Defense

Protect your organization from the increasing rate of PC theft and the substantial costs of replacing PC's and equipment due to theft using Absolute Software's ComputraceComplete.

ComputraceComplete is a PC security and tracking software which deters theft, recovers stolen notebooks and provides a theft recovery guarantee. Secure your Gateway notebooks for up to 5 years.

Theft Recovery Process

When you report a theft to the Absolute Recovery Team:

- ✓ The recovery team flags the reported system as "stolen" at Absolute's monitoring center.
- ✓ The system "calls in" every 15 minutes to report its location.
- ✓ The recovery team provides local law enforcement agencies with tracking information and the necessary documentation to obtain subpoenas and search warrants to recover your system.
- ✓ ComputraceComplete also gives you the option to remotely delete sensitive data from the missing system.

The Absolute Recovery team has a 90% recovery rate for systems that "call" the monitoring center after being stolen.

Deter Theft

ComputraceComplete allows you to efficiently monitor who is using your computers, what hardware and software changes they make and "where" your mobile systems are being used.

Guaranteed Theft Recovery¹

If your system installed with ComputraceComplete is stolen and reported to Absolute's Recovery Team, they will immediately begin the recovery process. If your system cannot be recovered within 60 days, Absolute will issue a recovery guarantee payment of up to \$1,000.

Secure Asset Tracking

ComputraceComplete also provides the ability to securely inventory, track and manage your remote and mobile systems with up to the minute accuracy. Proactively control your leased systems by centrally locating system lease and location information. It also helps ensure software license compliance.
